WORDING FOR AGENDA ITEM: Discussion of slurry leveling & pavement repair on Ragbrai route

EXECUTIVE SUMMARY: Plymouth County has let a project to do slurry crack filling and leveling on approximately 40 miles of their roads, including the RAGBRAI route through their county. Mark spoke with the Plymouth County Engineer who reported that the contractor for Plymouth County work was willing to extend their contract prices to Woodbury County to allow the rural Woodbury County portions of the RAGBRAI route to be patched and leveled at Plymouth County contract prices. Plymouth County is having the road repaired to the Woodbury County line. The price would be extended to patch one mile of K49 and one mile of D12 that would benefit from the slurry repair.

BACKGROUND: RAGBRAI organizers have reviewed the route and made a series of recommendations for road repairs prior to the ride. This repair method would address the repair issues at a minimal cost to the county.

FINANCIAL IMPACT: Cost of repair is based on a time and materials bid. Plymouth County contract costs run between \$4000 and \$8000 depending upon the number of cracks and areas leveled. Woodbury has adequate money within our pavement patching budget to pay for this work.

RECOMMENDATION: Recommend approval of a motion to allow the Secondary Road Department to make road repairs on D12 and K49 under the Plymouth County contract for slurry leveling and repair.

ACTION REQUIRED/PROPOSED MOTION: Motion to allow the Secondary Road Department to make road repairs on D12 and K49 under the Plymouth County contract for slurry leveling and repair.
