For County Recorder, Woodbury County IA
Prepared June 23, 2014

Historical Redaction of multiple data elements

—applies to Record Book images from Hosted OIB project

Cott will provide a service that combines the use of Optical Character Recognition (OCR) and Intelligent Character Recognition (ICR) technology and manual verification to identify and permanently redact sensitive data element(s). Based on a rigorously tested rule set and configured to your state's trends, clues are identified and sensitive information is flagged for redaction. Our verification clerks will review 100% of all flagged images one by one and either accept or reject the suggested redaction. The redacted images will be imported into Customer's base system for public search purposes.

¹ Estimated Fee as it relates to Historical Redaction

Flagging of the images. The number of images flagged for verification cannot be accurately predicted ahead of the actual processing of Customer's actual images. For projects where there is one data element, and if the actual number of images flagged for verification exceeds 15% of the total images processed, or for projects where there are from 2 up to 5 data elements, and the actual number of images flagged for verification exceeds 22%, an additional verification fee will be the responsibility of the Customer. As Cott processes images, Cott will notify the Customer if actual processing reveals an additional verification fee is likely. Once the last portion of images is verified, Cott will notify the customer of any additional verification fee. The fee for additional verification would be \$0.0118/image for every image beyond the respective 15% and 22%. For example, if 100,000 images for redaction of one data element were processed and 25,000 need verified, Cott will charge \$0.0118/image for 10,000 images.
