## Background & Financial Impact:

The City of Anthon has requested to have the D38 project scheduled for the summer of 2027 to be continued into the City Limits. This is a Farm to Market project. The Farm to Market is a strained budget. This request may require future projects to be delayed because projects cannot be let if there are not enough funds in the Woodbury County Farm to Market funds. One project that may be delayed would be the K42 concrete paving in 2028, this would also be tied to the possible 220th St paving, if that would be decided upon. If this is allowed, once the funds are received, the County will need to put these funds in the Farm to Market account which is held by the Iowa DOT. The City of Anthon owes the County for the 2026 project. That is \$48,741.78. The City is requesting to pay back the project costs over a 3-year period after the completion of the project. The current estimate is \$140,000 for the HMA roadwork. The costs does not include the sidewalk pedestrian ramps that the City will also need to do and pay with the project.

## Recommendation:

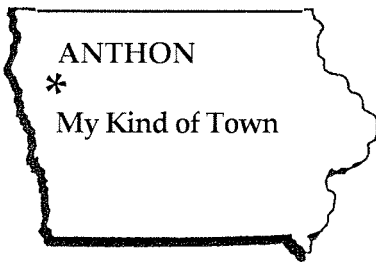

Recommend the Board to allow the extension and to allow the payback for the HMA items with

the City of Anthon

**Re: Request for Board of Supervisors Agenda Item; D-38 Resurfacing Project**

Dear Mark:

Thank you for attending the past two Anthon City Council meetings to discuss the D-38 resurfacing project; thank you to the County Engineer for her input on the project; and thank you to the entire Board for considering this request in advance.

The City of Anthon would like to resurface the portion of D-38 within Anthon limits by joining the County's resurfacing project for this road through the County. Because Anthon is just above the 500-population threshold, Anthon is responsible for bearing the cost of the portion of D-38 through the town. However, the Road Use Tax money received by Anthon is not adequate for all road repair needs. In addition, this portion of D-38 is heavily used by out-of-town truck traffic given the gravel pit just north of Anthon. **Accordingly, Anthon respectfully requests that it be allowed to repay the County for its portion of the resurfacing project of D-38 over a three-year term.** This three-year financing would greatly assist Anthon as it is currently undergoing significant upgrades to other infrastructure. We also understand that this type of repayment assistance is consistent with past road projects that the County has done with other cities.

As the City would like to give a final decision on joining the D-38 project to the County Engineer as soon as possible, the City would also respectfully request that this be placed on the agenda for the Board of Supervisors' consideration as soon as possible. Thank you.

Sincerely,

Connie L. Westphal
