Dawn Snyder, Education Director

Executive Summary

On behalf the Woodbury County Conservation Board, it is my pleasure to present the FY 14 Annual Report outlining the county conservation department's activities and accomplishments this past fiscal year.

The Woodbury County Conservation Board is a five-member volunteer board appointed by the county Board of Supervisors. Members are appointed for five-year terms. Meetings are scheduled the first Thursday of each month.

The Conservation Department manages sixteen areas comprising 5,525 acres including developed parks, preserves, wetlands, public hunting areas, river accesses, historical sites, and the Dorothy Pecaut Nature Center. Facilities are extensive and include the nature center, modern and non-modern campgrounds, cabins, swimming beaches, shower and restroom buildings, open and enclosed shelters, playgrounds, trails, paved roads, parking lots, signs, maintenance shops, and park residences. Additionally, the department holds fifteen conservation/scenic easements on 1,695 acres. Department staff includes thirteen full time, three regular part time, and approximately sixteen seasonal employees along with interns and numerous volunteers. Various employment crews are used to accomplish special tasks and projects.

Our mission is to provide high quality outdoor recreation and educational opportunities and to help people understand the value of natural resources in their lives. It has been our pleasure to carry out our mission and serve the public in this manner during the past fiscal year. The outstanding assistance and willing cooperation of so many local, state and federal agencies including the county Board of Supervisors and Secondary Roads Department, the Iowa Natural Resources Department, and numerous local organizations described in Section IV of this report is critical to the Conservation Department's continued success.

The past fiscal year was one of our busiest in history reflecting full recovery from effects of the 2011 Missouri River flood. It was exciting to turn our efforts toward new projects such as re-grading the entrance road to Southwood Conservation Area, construct two new concrete boat ramps on the Little Sioux River near Correctionville, and install water hydrants for each campsite at Brown's Lake and Snyder Bend Park. Staff has worked hard to maintain top quality facilities and outdoor recreation areas for the public. We look forward to continuing these efforts in the future.

Woodbury County has many outstanding natural resource and outdoor recreation opportunities supported by its taxpayers. I strongly encourage everyone to explore your county park areas. I hope you'll be pleasantly surprised.

Yours for Conservation,

Rick D. Schneider, Director

WOODBURY COUNTY CONSERVATION BOARD ANNUAL REPORT

July 1, 2013 to June 30, 2014

I. BOARD ROSTER/MEETINGS

The conservation board members are appointed by the Board of Supervisors for five year terms. Members serving in 2013-2014 were as follows:

<u>Meetings Attended</u>	<u>Name</u>	<u>Position</u>	<u>Expiration Date</u>
11	Chris Zellmer-Zant	President	December 31, 2015
9	Don Dixon	Vice President	December 31, 2017
10	Cindy Bennett	Secretary	December 31, 2018
8	Mark Taylor	Member	December 31, 2014
5	Greg Grupp	Member	December 31, 2016
4	Suzan Boden	Member	December 31, 2016

Cindy Bennett's term expired December 31, 2013 and she was reappointed to another five year term in December, 2013. Greg Grupp resigned January 15, 2014 after 12 years of service and was replaced by Suzan Boden of Sioux City.

The Board held eleven regular monthly meetings during the fiscal year. Minutes of these meetings are on file in the conservation office at Dorothy Pecaut Nature Center and are available for viewing on our website www.woodburyparks.com.

OTHER MEETINGS ATTENDED

Three staff and two board members attended the Iowa State Association of County Conservation Boards Annual Conference held at Arrowwood Resort in Okoboji on September 26 - 28, 2013. The department's law enforcement officers attended the County Conservation Peace Officers Association's annual law enforcement workshop on October 7-9, 2013 at the Iowa Law Enforcement Academy in Johnston, Iowa. Five staff attended the annual Winterfest Employee Workshop in Waterloo on January 21-23, 2014. The Director attended the ISAC Fall School of Instruction in Des Moines on November 14-15, 2013 and the Spring School of Instruction in Des Moines on March 13-14, 2014. Staff members hosted a county conservation booth at the Woodbury County Fair in August 2013 and assisted with a district conservation booth at the Clay County Fair in September 2013. The Director attended the Spring IACCB Conference in Ames on April 5, 2014. Three staff and one board member attended the biennial REAP Regional Assembly in Correctionville in October 15, 2013.

Additional meetings attended by employees and/or board members during the fiscal year were as follows:

Loess Hills Prairie Seminar – May 30 - June 1, 2014 in Monona County
Western Regional CCPOA Law Enforcement Workshop
Iowa Association of Naturalists Spring meeting – Dickinson County Nature Center
Woodbury County training meetings
Pesticide and Water Operator training meetings
Woodbury County Conservation Foundation meetings
Woodbury County Department Head meetings
Grow Siouxland committee meetings
Loess Hills Alliance committee meetings
Western Iowa Tourism meetings
IACCB District meetings
National Wild Turkey Federation Chapter
Pheasants Forever Chapter
Staff meetings

The Conservation Board hosted a volunteer recognition and awards presentation reception on March 20, 2013 at Dorothy Pecaut Nature Center. Numerous volunteers were recognized for their many hours of service to the Board and the Nature Center. Dick Sorenson of Sioux City was presented the Conservation Educator Award for his many years of volunteer service as a Hunter Safety Instructor. Donna Popp of Sioux City was presented the Friend of Conservation Award for her numerous hours of volunteer service at the Nature Center.

II. ADMINISTRATION/MAINTENANCE

Staffing

Department staff during the fiscal year included thirteen full time, three regular part time and numerous seasonal employees. A part time Senior Aid position through the Woodbury County Community Action Agency continued to provide valuable receptionist assistance while providing employment for previously retired individuals.

The department's five Resource Managers and Deputy Director are certified law enforcement officers who maintain their certification through the Iowa Law Enforcement Academy. These officers are also covered under the IPERS Protective Class of employees whereby the employer and employee both pay a higher rate into IPERS retirement system. Brian Stehr, Resource Manager at Snyder Bend Park, attended and completed the 254th Basic Level I Training Academy at the Iowa Law Enforcement Academy from January 6 – April 11, 2014. Retirement of another Resource Manager is expected during the next fiscal year.

Numerous temporary seasonal employees were hired from April through October for maintenance tasks in the county park and wildlife areas.

Various employment programs provided through a variety of other agencies in the community help supplement board staffing needs when available. Conservation Corps Iowa, the AmeriCorps program through the Minnesota Conservation Corps, was contracted to work a total of 5 days in July 2013 and again in October 2013. Four naturalist interns were employed in 2013 and 2014 to assist with summer camps and programs at the nature center and parks and to assist with resource management tasks. Work Study interns from Briar Cliff University and Morningside College were employed during the school year. An "Outdoor Skills" youth grant provided funding to hire one intern in 2014 to teach and promote various outdoor skills to area youth. The Woodbury County Conservation Foundation provided funding for a Habitat intern to work on projects near the Nature Center, Riverside Bluffs, and other park areas. Board staff uses community service workers when available. Campground host volunteers provided a valuable service and were used in most of the parks at least part of the camping season. General volunteers are an important resource and have been a great assistance at the Nature Center and in the parks. The Nature Calls fund raiser event uses over 90 volunteers each year. The Receptionist/Volunteer Coordinator position works to contact and organize volunteers. Staff continued to recruit and train volunteers to provide a wide variety of assistance with many tasks. Numerous groups including area businesses, Middle School Peer Helpers, high school students, college students, church groups, and Boy Scout and Girl Scout troops provided numerous volunteers that completed a variety of projects and tasks for the board during the year.

Positions employed hired throughout the fiscal year were as follows:

- (1) Director
- (1) Deputy Director – Field Operations
- (4) Resource Manager
- (1) Assistant Resource Manager
- (2) Resource Technician
- (1) Office Manager
- (9) Seasonal Park Ranger
- (1) Education Programs Director
- (1) Naturalist
- (1) Resource Naturalist
- (2) Nature Center Receptionist
- (1) Receptionist/Volunteer Coordinator
- (11) Summer Intern Naturalist
- (4) Security Guard
- (9) Seasonal Park Maintenance Employee

- (2) Outdoor Skills IDNR Grant employee
- (2) Habitat Intern

The number of employees listed represents the various persons hired to fill these positions over a two season period. The numbers do not necessarily represent the number of authorized positions.

Grants

The Conservation Department is very active in pursuing grant opportunities each year. Numerous grant applications were written and submitted by board staff during the fiscal year including the following:

<u>Grants Submitted</u>	<u>Description</u>	<u>\$ Requested</u>	<u>\$ Awarded</u>	<u>Award Date</u>
IDNR Outdoor Skills	Teach outdoor skills	\$ 2,500	\$ 2,500	March 2014
Wal-Mart Foundation	Outdoor Playscape	\$ 2,500	\$ 500	July 2013
American Great Outdoors	Prairie Restoration	\$ 8,489	\$ 8,849	October 2013
Iowa Native Plant Society	Chain saw/safety equip.	\$ 1,000	\$ 934	March 2014
Burlington Northern Found.	Outdoor Playscape	\$ 10,000	\$ 10,000	January 2014
Gilchrist Foundation	Tree Shear	\$ 7,500	\$ 9,400	July 2013
Gilchrist Foundation	Boat Docks	\$ 34,940	\$ 0	July 2014
Burlington Northern Found.	Outdoor Playscape	\$ 10,000	\$ 10,000	March 2014

Conservation staff continues to seek grant dollars and leverage available funds to assist with major development projects, land acquisition, publicity, and environmental education. **During FY14, a total of \$77,900 in grants was administered and another \$34,940 in grant applications was written and submitted for funding.**

Long Range Planning

Long range strategic planning is a very important responsibility of the Board. A special strategic planning meeting was held by the Board as part of their regular meeting on April 5, 2014. Accomplishments included review of staff succession plans, review of the Salary/Wage Plan, discussion of possible solutions to correcting problems at the Stub Gray Shooting Range, discussion of renovation plans for Little Sioux Park and Bigelow Park beach areas, review of Personnel Policies, and discussion of the five-year Capital Improvement Program. Long range planning needs to be addressed every year to maintain focus and purpose by the Board and an efficient, effective and responsive department.

Board Policies

Board policies are reviewed annually and are addressed when needs arise. The Conservation Board coordinates department policies closely with other county policies and procedures. The Board affirmed a plan for review and updating policies during the next fiscal year. A vehicle and equipment numbering/tracking system is ready for incorporation in the next fiscal year. Fee schedules were reviewed and a few increases were approved for campsites and Nature Center rentals. Camping coupons discount booklets were introduced for sale along with firewood coupon booklets and proved to be very popular.

Training

Training requirements for new and existing employees involves a large time commitment. A variety of training must be administered and received to ensure that employees are prepared to do their jobs. New full time and seasonal employees receive orientation training regarding board policies, especially safety related concerns. Training is important to ensure that employees are able to safely and efficiently do their jobs.

Staff attended numerous specialized training sessions during the fiscal year, many of which were required to maintain certifications. The Board's six Law Enforcement Officers attended various training and certification schools including the County Conservation Peace Officers Association's annual training school at the Iowa Law Enforcement Academy in October 2013 to obtain required continuing education units and firearms qualification. Additional training was received at the Western Iowa Regional Workshop held in March 2014. Five employees attended the Winterfest Employees Training Workshop in Waterloo in

January 2014. Training sessions on safety issues typically result in a review of Personal Protective Equipment and acquisition of items needed to keep employees safe.

Staff attended a Prescribed Wildfire refresher course in February 2014 to maintain their wild land firefighting knowledge and certification. Full time park staff attended the county safety meeting held at Dorothy Pecaut Nature Center on November 7, 2013. Three staff and two board members attended the Iowa Association of County Conservation Boards annual conference at Arrowwood Resort in Okoboji in September 2013. Eight staff members are required to maintain Pesticide Applicator Certification in several categories and attended several sessions during the year to obtain continuing education units for certification. The Director and Deputy Director attended classes to receive continuing education units for maintaining certification as Water System Distribution Operators for the Nature Center's public water supply system. All full time staff maintains CPR, AED and Basic First Aid certification.

Committees/Appointments

Woodbury County will host the 2014 annual conference for county conservation boards September 25-27. A Conference Planning Committee consisting of the Director, Deputy Director, Education Programs Director, Gregg Grupp, Mark Taylor and Plymouth County Conservation Director met monthly throughout the year.

The Deputy Director served as a member of the statewide review committee for competitive county conservation board REAP grants. Dawn Snyder, Education Programs Director, served on the REAP Conservation Education Programs statewide grant review and scoring committee. The Director served as an alternate from Woodbury County to the Loess Hills Alliance Board of Directors and as a member of the Stewardship Committee, Protection Committee and the Protection Committee's grant review group, and the Deputy Director served on the Stewardship Committee. The Director and Deputy Director served on the Habitat and Executive Committees for the Woodbury County Chapter of Pheasants Forever. The Director served as Publicity Chair for the local chapter of the National Wild Turkey Federation, and served on the Woodbury County Health Insurance Committee. Bob Fundermann, Assistant Resource Manager, served as Chief Firearms Instructor for the County Conservation Peace Officers Association. Bernie Ketelsen, Resource Manager, served on the Woodbury County Safety Committee. Dawn Snyder and Board member Christine Zellmer-Zant served on the Woodbury County Conservation Foundation. All five Board members served on the Woodbury County Conservation Endowment Board. Two staff and Board member Mark Taylor serve on the Woodbury County REAP Committee.

Agreements/Partnerships

The Board and staff have continued to develop and nurture partnerships with numerous agencies and organizations for the benefit of conservation. Board staff continued to work with area school districts regarding incorporation of annual field trips to the Dorothy Pecaut Nature Center for various grades. The Board's Receptionist/Volunteer Coordinator and Resource Naturalist also worked with various agencies to provide after school programs for youth and public programs in the parks. Ducks Unlimited has been a major partner through agreements with the Board to develop and enhance Owego Wetland Complex and other areas in the county. The Loess Hills Alliance has provided partnership opportunities by making available through the Board fire fighting equipment to be used on private lands. The Alliance also provides continuing training for Advanced Wildland Burns whereby board staff receives refresher training. Trained individuals can be available to assist the National Park Service in fighting forest fires. An Agreement is maintained with Golden Hills Resource Conservation Development to provide for the installation and long-term maintenance of special interpretive panel signs along the Loess Hills Scenic Byway. A major partnership effort has been formed between the Board and the Natural Resources Conservation Service in developing various agreements to manage the Owego Wetland Complex.

Siouxland District Health Department provides testing services for the nature center's public water supply

Brown's Lake

as required by IDNR, and conducts annual water testing on all park wells. Staff worked with Iowa DNR and CF Industries to erect nesting towers for Ospreys on the north shore of Brown's Lake and along Snyder Bend Lake in November 2013.

Brown's Lake osprey

The Board continued to nurture partnerships and agreements with Iowa Natural Heritage Foundation regarding conservation easements and Woodbury County Pheasants Forever in acquiring and providing seed and seeding equipment. A native prairie educational planting was completed at North High School as a cooperative effort among Woodbury County Pheasants Forever, Sioux City School District and the Conservation Department. An extremely valuable partnership is maintained with the County Secondary Roads Department. Secondary Roads has provided countless hours of work with specialized heavy equipment, surveys, engineering and construction oversight on numerous conservation projects. A special Interdepartmental Agreement for maintaining specified park roads continued between the Conservation Board and Secondary Roads. In the past fiscal year, the Secondary Roads Department staff provided engineering design services for the Southwood entrance road re-grading project and the Nature Center road and parking lot paving project.

The Board sponsored its annual Camping Kick-Off Weekend at all county campgrounds the first weekend in May which was well received. Campers received a voucher for one night free camping later in 2014 along with other small gifts. Board staff also works closely with staff from Stone State Park on prairie and trail management around the nature center.

A more detailed description of various cooperative ventures is discussed in **Section IV** of this report.

Technology

Board staff continued to make considerable use of GIS technology for better management of county parks and wildlife areas, and use in various grant and permit applications. This technology is heavily used for prescribed burn management of wildlife areas and preparing detailed maps for grants or permit applications. The department's GIS Specialist retired but was contracted in January 2014 to provide some GIS mapping services and train a new Specialist.

The Director worked closely with the County IT Department to find a faster and more economical source for data signal for conservation offices and the Nature Center. Following months of research, new cabling and antennas were installed to bring in a Verizon signal. The signal proved adequate, but the cost continues to be an issue which will be addressed in the next fiscal year.

The board's updated website, www.woodburyparks.com, provides a multitude of information for visitors. Available cabin rental dates for the Board's camping cabins at Little Sioux Park and Snyder Bend Park can be accessed through the website. Video clips are available showing the inside of the cabins and enclosed shelters as well as the nature center. Donations and certain sales can also be made through the website. All four park offices are connected to the internet and the County's GroupWise email and main "U" Drive which provides an efficient method of information exchange with the main office. High speed internet access has been installed at all park offices, and wireless internet access for campers and park users at Snyder Bend Park and Bigelow Park. It will be a goal of the Department to provide high speed wireless internet access at the Nature Center and for park users in all four of the main developed park areas in the future.

The board continued to provide three outlets for the public to obtain DNR licenses at Little Sioux Park, Southwood Conservation Area, and Brown's Lake. These outlets are part of the DNR's electronic licensing system that has been operating since 2000, and these systems were upgraded in 2010.

The Board is part of a statewide publicity and promotion effort for all county conservation boards through a website, www.MyCountyParks.com. This advanced website provides excellent access for all county conservation boards in Iowa to promote their areas and facilities to potential visitors across the country.

Environmental Education/Publicity

The Board's environmental education program continued to experience strong demand for programs and information during its twenty-fifth year. Emphasis for school class programs is centered on encouraging classes to visit the nature center and experience the outdoors in the loess hills. Students have the opportunity to view and learn from the exhibits, watch educational videos, listen to a naturalist program or participate in an educational hike. Volunteers are an immense help with the many classes that come to the center. The nature center is an excellent facility to host various types of public programs regardless of weather conditions. Board naturalists and the Director conducted numerous radio and television interviews concerning various programs and events during the fiscal year. Numerous programs were presented to various groups and organizations in the community and at the county parks. The Board cooperated with the Woodbury County Soil Conservation District in providing trees to fifth graders in rural school districts throughout the county. The Board's newsletter, "Woodbury Wanderings", continued to be a popular publication and is published three times a year and is available on the website in digital format. The Board continued to sell advertising to help support printing costs of the newsletter which is a free publication. Efforts continue to encourage subscribers to sign up to receive the newsletter electronically. Several Resource Managers, the Deputy Director, and naturalists serve or assist as Hunter Safety and Fur Harvester Instructors teaching and assisting with these classes throughout the county during the year. Several classes are held at the nature center and various park offices. Hunter Safety classes are now part of the curriculum of the three local public high schools and are assisted by Board staff with over 200 students receiving the training in the past year. The nature center Gift Shop features many items which help promote the nature center with its name and logo. Summer day camps held at the nature center were again very successful, are self-sustaining, and continue to be expanded where possible. A complete annual report of the Board's environmental education program is located at the end of this report in **Section VII**.

The Board provided an information booth at the Woodbury County Fair in conjunction with other county departments. Staff also assisted with a District III County Conservation booth at the Clay County Fair in September 2013.

A dedicated, hard working group of volunteers worked with the Education Programs Director and Naturalist to raise money for nature center programs and needs through the tenth annual "Nature Calls" fund raiser. Over \$45,000 was raised at the September 14, 2013 event which was held at the Sioux City Convention Center. Recent proceeds have helped fund one summer naturalist intern and upgrades to the Nature Center.

Communication

Communication contacts between various conservation organizations and the Board were coordinated by the Director during the fiscal year. Maintaining close working relationships with various state, county, and federal organizations along with local organizations is a high priority. Staff continually seeks new methods to communicate through the Board's website and other electronic means.

Regular staff meetings were conducted during the fiscal year. Communication efforts among staff locations have been enhanced with the use of e-mail, high-speed internet, fax machines, and cell phones. Conservation staff conducted regular maintenance checks on major equipment, playground equipment, park facilities and vehicles during the year. Emphasis is placed on safety issues in all park areas according to the Board's safety policy. Routine safety inspections of park shops help ensure a safe working environment for employees and compliance with OSHA regulations.

Equipment Purchases

Major equipment/furniture items purchased by the Board during the fiscal year were as follows:

	<u>Item</u>	<u>Cost</u>
1	M&M Hdra Clip Tree Shear	\$ 9,400
2	John Deere TX Gator UTV	\$ 17,314
1	Toyota Prius	\$ 23,309

1	Schulte FX-1200 10' Bat Wing Mower	\$ 13,265
1	Used 2002 International Tandem Axel Dump Truck	\$ 37,000
1	Used Bobcat Backhoe Attachment	\$ 5,500
2	Stihl Brush Saw	\$ 2,376
1	Stihl Chain Saw	\$ 567

A complete equipment inventory is on file in the conservation office.

III. FUTURE

CIP/Revenue Requirements

The Capital Improvement Program (CIP) for the Conservation Department is reviewed regularly by the Conservation Board. A minimum five year improvement program is prioritized, approved annually and submitted to the Board of Supervisors as part of the annual budgeting process. The CIP is based on needs and available grants and revenues, and can fluctuate throughout the year. In Section VI, this report describes various capital improvement projects scheduled for completion during the next fiscal year. These include improvement upgrades to the Little Sioux Park swim beach and Stub Gray Shooting Range, improvement of the nature center access road and parking lot and related repairs, remodeling the Bigelow Park manager residence, extending water to all campsites at Snyder Bend, replacing playground surfacing material, and numerous other projects. Longer range projects include construction of a picnic shelter and cabins at Southwood Conservation Area, making better use of the shelter at Fowler Forest Preserve, renovating the Bellamy Campground at Little Sioux Park, and an accessible fishing jetty at Brown's Lake. All projects are dependent on park user fees and other revenues generated from conservation areas that are deposited into the Conservation Reserve Fund which finances these improvements. These revenues are also used as leverage to cost-share with available grant programs which provide additional funding for capital improvement projects. Effective with the 2014 season, the Board approved an increase in fees for modern campsites to \$20 per night and for non-modern campsites to \$15 per night.

Large scale projects could not be completed without the availability of various grant monies. Applications to grant programs such as LAWCON and REAP as well as project specific grants will be made when appropriate provided grant monies and match dollars continue to be available. Many state and federal grant sources are shrinking or disappearing completely. Construction costs continue to rise at a steady pace making it imperative that grant funds be obtained to complete necessary capital improvements. The Board and staff need to continue to look for new sources of revenue, and the county Board of Supervisors needs to be involved in this effort. User fees and other charges will continue to be monitored to insure a competitive product and price, but these revenues will need to be supplemented with additional sources. Long range planning must be an on-going effort by the Conservation Board and staff and should include the Board of Supervisors in dealing with this problem. The Board has collaborated in the past with the Board of Supervisors to issue bonds to finance specific projects with park revenues used to pay back the bonds. This is an innovative way to complete high cost improvements when interest rates are attractive for borrowing.

Land Acquisition

Land acquisition efforts are anticipated to be minimal during the next fiscal year. Easement opportunities will be monitored for any attractive possibilities.

Rare opportunities for fee title acquisition occasionally arise from willing sellers and the Board should take advantage of these offers coupled with the availability of grant dollars to fund acquisitions. The Board will continue to work only with willing sellers, and potential acquisitions will be reviewed to determine their viability within the Board's system and Long Range Land Acquisition Plan. Acquisitions are usually dependent upon grants which typically fund 50% -100% of acquisition costs.

Cooperation

As described in Section IV, the Board will continue to cooperate wherever possible with other agencies, departments, and private organizations to further the awareness of conservation and promote the Board's goals and objectives throughout the next fiscal year. Cooperative efforts and partnerships are critical to the success of the Conservation Board. Locally, the Board looks forward to continuing cooperation with Western Iowa Tech, Pheasants Forever, National Wild Turkey Federation, Ducks Unlimited and River City

Anglers Club. The Board will also continue to work with the Woodbury County Conservation Foundation, Loess Hills Audubon, the Northwest Iowa Sierra Club, Stone State Park and IDNR, The Nature Conservancy and Iowa Natural Heritage Foundation to promote conservation issues and projects. Collaborative efforts will continue with the Loess Hills Alliance to promote conservation and protection measures for Iowa's loess hills. The Board also looks forward to continued use of various grant programs including employment programs such as Conservation Corps Iowa and Woodbury County Community Action Agency Senior Aides program, and community service worker programs, along with interns and volunteers to complete various maintenance and educational projects throughout the Board's conservation system.

A critically important cooperative relationship exists between the Conservation Department and other county departments, particularly Secondary Roads. Many projects could not get accomplished or could cost much more if it wasn't for the willing cooperation of the County Engineer and his staff who assist often with a variety of maintenance and construction projects in the parks due to their specialized equipment and expertise. It is imperative that these types of relationships continue among departments.

Priorities/Strategic Planning

The Board's top priorities for the next fiscal year will be construction of new accesses to the Little Sioux River, regrading a portion of the Southwood Conservation Area access road, and seeking solutions to repair or replace paving of the nature center access road and parking lot. The Board's policies and long range plans will continue to be reviewed and updated as necessary. Future planning efforts assist in developing the Board's budget requests, and a strategic planning meeting of the Board needs to be held annually. Board priorities continually change, but timely review of these priorities will allow needs to be efficiently matched with limited resources. Strategic planning has already proven its value within the department.

Staff

Full time conservation staff numbers have been insufficient for many years, but have been addressed through strategic planning and communication with the Board of Supervisors. Priorities for full time staff positions include a Natural Resources Coordinator, two additional Resource Technician positions, and a third naturalist for the department. With the recent retirement of the department's GIS Specialist, the Board has no trained staff or specialist to work on GIS projects which are critical to department efficiency. The increasing amount of state and federal regulations and requirements along with grant writing and personnel issues reduces productive hours and places pressure on available employees. Increasing training requirements take more hours away from department production thereby placing even more pressure on limited manpower resources. New staff positions should be considered which can better accommodate and benefit the Board's programs and service to the public. Additional employee retirements within the next five years will also impact staff needs and will require reassessment and probable reassignment of duties. Position requests have been favorably received by the Board of Supervisors, but recent economic conditions and budget constraints have not allowed new positions to be added at the present time.

Board staff will continue to recruit, train and organize volunteers that can assist with operating and maintaining the nature center and park facilities. Campground hosts have proven to be particularly effective, and staff will continue to seek individuals willing to serve in that capacity. The Board will continue to annually recognize special individuals who have made outstanding contributions of their time and efforts to apply conservation practices and promote conservation education by conferring the "Friend of Conservation" and "Conservation Educator" awards. The volunteer recognition program will continue to reward and acknowledge those dedicated volunteers that assist the Board in various ways. The Board's outstanding environmental education program will continue to be the top promotional tool for the Board's park and conservation areas and programs.

IV. COOPERATIVE PROGRAMS AND ORGANIZATIONS

1. Cage Catfish Program

For many years, the Conservation Board received nearly 3,000 catfish fingerlings annually from the Iowa Department of Natural Resources Fisheries Division to be raised in cages at Little Sioux Park and Southwood Conservation Area. The fish are released in late summer. Following the 2013 season, this popular program was discontinued. The Cage Catfish Program has provided catchable size fish in a much quicker time period than normal maintenance stocking. It has also

been a very visible program to the public which encouraged them to ask questions about various fish stocking programs and techniques.

State fisheries personnel also assist in checking, managing and stocking the county-owned lakes and ponds as well as state-owned lakes, including Snyder Bend Lake and Brown's Lake. Occasional maintenance stockings are conducted in Snyder Bend Lake and Brown's Lake. The state also conducts occasional creel surveys and investigates for undesirable vegetation problems such as Eurasian watermilfoil and Brittle Naiad found and treated previously in Little Sioux Park and Snyder Bend Lake. The most recent problem of an exotic species, Asian Carp, are now found in the Missouri River and attached oxbow lakes such as Snyder Bend Lake and inland rivers including the Big Sioux River and Little Sioux River due to the 2011 flood. DNR Fisheries staff has documented Naiad species in Little Sioux Park Lake again which will need to be closely monitored.

2. Management Agreements

The Woodbury County Conservation Board presently operates two areas totaling 46 acres under management agreement with the Iowa Department of Natural resources. These areas include Bigelow Park and the office/nature center area at Stone Park. The Board also operates one area under management agreement with the Iowa Department of Transportation which is the Copeland Park Access on the Little Sioux River west of Correctionville at the State Highway #31 bridge. The Bigelow Park management agreement was renewed as a 50 year management lease agreement in 2010.

3. Wildlife Habitat Restoration Program

The Board maintains an active wildlife habitat restoration program by planting tree and shrub seedlings and various types of grass cover and food plots on its park lands each year. Last year, 60.1 pounds of prairie and forb seed were planted on 8 acres of public land and one acre of private land. Wildlife food plots totaling 70.7 acres were planted on public wildlife areas. Controlled burns for prairie for grassland improvement as well as seed production were conducted on 404 acres. Staff cooperated with the Woodbury County Pheasants Forever Chapter in providing free seed for establishing food plots on public and private lands.

The Board's undeveloped wildlife areas are managed specifically for wildlife populations. Food plots and farmlands are managed to benefit wildlife. Some lands are enrolled in USDA programs, including eight CRP contracts and six WRP contracts which the Board must maintain.

The restoration and establishment of native prairie and forbs is a popular component of the board's habitat program. The board maintains four Truax native grass drills of various sizes required to plant native grass seed, and the board's equipment and technical assistance is constantly in demand. Ranging from the small 6' drill, which is ideal for small plantings, to the large 12' no till drill which is suitable for large acre planting, the drills are made available to landowners on a rental basis and were used to plant hundreds of acres in the fall of 2013 and the spring of 2014. Depending on time and weather, staff typically harvests native grass seed each fall for use in replanting both public and private areas as well as providing a seed source for roadside vegetation management programs. No seed was harvested during fall 2013. The Board assists the Secondary Roads Department with seeding various road shouldering, regrading and box culvert construction projects throughout the county. Native grass species are used when practical.

Non game habitat improvement programs include maintenance of bluebird house trails at Southwood Conservation Area and Little Sioux Park. Volunteers also maintain bluebird house trails along one mile of fence line at the Interstate rest area south of Sergeant Bluff, and the Dorothy Pecaut Nature Center. Osprey nesting towers were erected on the north shore of Brown's Lake and east shore of Snyder Bend Lake in November 2013. Other non-game efforts include a variety of programs offered to the public. Board staff assists the local Ducks Unlimited chapter at the annual Green Wing Day for youth and assist with construction of woodduck houses for use throughout the county. These houses are installed at various sites by department staff and monitored occasionally to determine usage and condition. Representatives from the Waterfowl Association of Iowa have assisted with installing nesting structures at Owego Wetland Complex.

Special planting equipment for planting seedling trees and shrubs is made available to landowners on a donation basis. Employees work closely with landowners and state conservation personnel surveying and establishing populations of wildlife species as well as enforcing fish and game regulations.

Since 1983, conservation staff has assisted to a small degree with implementation of the "Slough Bill" which helped benefit wildlife through designation of certain private habitat lands as tax exempt properties. In spring 2014, the County Assessor presented a new resolution to the Board of Supervisors that eliminated the "Slough Bill" exemptions. Exemptions for Native Prairie, Wildlife Habitat and Forest/Fruit Tree Reservation are still available to landowners. The discontinuation of the "Slough Bill" exemption program could mean the loss of over 2,400 acres of habitat.

4. Water Recreation Access Cost-Share

This state cost-share program typically provides up to seventy-five percent of the cost for boat ramps, docks, and related facilities used by boaters and fishermen. The Conservation Board has obtained several boat ramp and dock facilities through this program, as well as assistance for parking lot improvements and restroom facilities. A limited amount of funds are made available to conservation boards each year for various cost-share projects. Monies in this fund are derived from a special tax on fuel sold within the state. In January 2013, Board staff submitted a grant application for cost share funding on the proposed boat ramp project on the Little Sioux River at Little Sioux Park and was successful in receiving up to \$52,000 toward that project. Construction began in November 2013 and the project was completed in April 2014.

5. Supplemental Environment Projects (SEP)

The Iowa Department of Natural Resources Environmental Protection Division has established a process whereby monies paid as penalties in environmental enforcement cases can be directed to supplemental environmental projects, or SEPs. Instead of fines and penalties being paid into the state's general fund, the process allows for the penalties to be directed to the county conservation board in the county where the violation occurred for the board to expend on environmentally beneficial projects. An annual report is sent to IDNR to verify the amount of monies collected during the fiscal year and explain how they were expended by the county. Monies are placed in a special SEP fund and budgeted for expenditure through that fund. During the fiscal year, no environmental penalties or fund interest were received by the Conservation Board, and the fund contains a zero balance. The Conservation Board has designated Owego Wetland Complex as their main priority for expenditure of any SEP funds.

6. Naturalist Programs

The Board's environmental education program completed its twenty-fifth full year in June 2014. Please refer to **Section VII - Dorothy Pecaut Nature Center Annual Report**. Although most programs and presentations are organized by the naturalists, the Director and other staff assist in presenting programs to various groups and organizations throughout the year. Staff members occasionally participate in various publicity efforts with the media. Resource Managers are frequently requested to present programs to school classes as well as information on specific topics about their areas and careers.

7. Boy Scouts/Girl Scouts

Scouting programs in the area continue to use county conservation parks for camping and other activities. The naturalists and Resource Naturalist occasionally work with Eagle Scout candidates and Girl Scout Gold Award candidates on their community service projects. Several Eagle Scout projects were planned and completed for the nature center during the last fiscal year involving the Outdoor Playscape project. Staff will continue to work with scout groups to foster an interest in conservation ethics and careers, and to provide opportunities for smaller service projects.

8. Woodbury County Pheasants Forever

This local private organization was formed in January 1986. The group is dedicated to improving habitat to increase the number of pheasants within the county, and works with landowners and other conservation agencies to meet their goals. Since 1987, the local chapter has assisted financially in the purchase of 852 acres of additional wildlife habitat areas in the county. In two acquisitions, the local chapter was responsible for nearly 25% of the total acquisition costs.

The Chapter hosted a Youth Day in conjunction with Whitetails Unlimited at Little Sioux Park October 2013 with 70 youth in attendance, and a Youth Fishing Derby in June 2014. In the spring of 2014, the Pheasants Forever (PF) Chapter and conservation staff cooperated in providing 300 pounds of free seed for establishment of food plots on public and private lands. Board staff assisted the Chapter by providing equipment and planting advice when possible to private landowners along with equipment for prescribed burns. Staff also provided equipment and labor to drill a one acre outdoor classroom native prairie at North High School with PF providing the seed. The Board plans to continue cooperative efforts with the Pheasants Forever Chapter for the establishment of additional permanent habitat and food plots on private lands.

9. River City Anglers Club

The River City Anglers Club is a local organization comprised of persons interested in the betterment of fishing resources in the local and Midwest area. The group holds an annual event featuring fishing experts and a swap meet to raise monies that can be used for special projects benefiting fish resources and fishermen. The club has donated several thousand dollars to the Board for the improvement of fishing facilities and opportunities at Brown's Lake and Snyder Bend, and sponsored the 400 gallon aquarium display at the nature center. In 2014 the Club agreed to fund extension of electric power and two night security lights for the Brown's Lake boat ramp and restroom area.

10. Iowa Natural Heritage Foundation

The Iowa Natural Heritage Foundation is an IRS 501(c) (3) organization dedicated to the conservation and preservation of natural resources in Iowa. This group can provide specialized assistance to landowners in the acquisition and protection of various types of land. The Conservation Board utilized the assistance of the Heritage Foundation in acquiring an addition to Shagbark Hills in 1987, the Hammond addition to Southwood Conservation Area in 1989, three additions to Oak Ridge in 1999, 2000 and 2006, two additions to Owego Wetland Complex in 2001, and negotiation of permanent conservation easements. The advantages of the foundation include quicker response to seller's requests and demands, and the ability to provide specialized tax deductible options to willing sellers that cannot be provided by governmental entities. The Foundation provides their services at cost, and the Conservation Board maintains a sustaining membership with this organization.

The Board holds fifteen easements on over 1,695 acres and is responsible for annual monitoring of these easements.

11. Woodbury County Conservation Foundation

The Woodbury County Conservation Foundation was formed in January 1990. It is an incorporated non-profit organization that received tax exempt status in 1991, and is dedicated to the conservation and preservation of natural resources in Woodbury County. Similar in goals to the Iowa Natural Heritage Foundation, the Woodbury County Conservation Foundation concentrates on specific projects to assist the Conservation Board in completing major acquisition and construction projects. The foundation's main goals have been the acquisition and protection of native loess hill prairie areas and the establishment of a regional nature center for the conservation board. The foundation's most ambitious project, establishment of a nature center, was realized in 1995. The foundation's tax exempt status is an invaluable help in raising funds for various projects such as the nature center, and will continue to be a vehicle for future fundraising efforts. The foundation has positions for nine directors, two seats which are reserved for a county conservation board member and staff member. Dawn Snyder, Education Programs Director and conservation

board member Christine Zellmer-Zant served as representatives on the foundation board of directors. Dawn also serves as Secretary/Treasurer for the Foundation. Regular meetings are held by the foundation, and its mailing address continues to be the Conservation Board office mailing address. As a 501(c) (3) organization, the foundation provides a tax-deductible avenue for donations, contributions and grants to be used toward conservation projects including the nature center, land acquisition, and parks.

During the fiscal year, a special group of nearly 90 volunteers worked on the Board's annual fundraising "Nature Calls" event, a micro brew tasting and auction event held each fall. The tenth annual event was held September 14, 2013 and netted over \$28,000 for the Outdoor Playscape and other improvements at the Nature Center. The Foundation provided funding for a Habitat Intern in 2014 to work on prairies and other habitats. They also provided funding for a Conservation Corps Iowa crew of six workers to conduct five days of tree and brush clearing as part of prairie restoration efforts at Riverside Bluffs. The Foundation continued to offer special incentives to boost memberships, including camping discounts, free nights of camping and nature center gift shop discounts. On January 26, 2014 the Foundation held its annual meeting at the nature center and featured a program by local outdoor writer Larry Myhre. The Foundation has continued to fund scholarships for needy Summer Camp children.

12. REAP

The Iowa Resource Enhancement and Protection Act (REAP) was passed by the 1989 session of the Iowa General Assembly and went into effect July 1, 1989. This legislation was to be a long-term, multi-million dollar commitment to the protection, maintenance, and enhancement of natural and scenic areas; county and state parks; upgrading environmental education programs; protection of endangered animal and plant species and wildlife habitat; halting soil erosion; and improving air and water quality. The program will celebrate its 25th anniversary in FY 15.

For the 2014 fiscal year, \$16 million was appropriated by the Iowa legislature which was allocated among eight different areas, including conservation boards, which will share 20% of the appropriation. Of this 20%, sixty percent goes directly to county boards on per county and per capita basis. The remaining 40% is administered through the Natural Resources Commission for competitive grants to conservation boards. To be eligible for the per capita share and competitive grants, counties must spend at least 22 cents per thousand dollars of taxable valuation on conservation programs. During the 2014 fiscal year, Woodbury County spent approximately 41.9 cents per thousand dollars of taxable valuation on conservation programs. During the fiscal year, Woodbury County received \$9,848 for its per county share and \$32,392 for its per capita share. Also credited to the REAP account was \$561.05 in interest.

During the fiscal year, expenditures in the amount of \$64,061.78 was made from the REAP account for construction of the Walling Access boat ramp and the 25% cost share on the Little Sioux Park boat ramp projects.

Carryovers in the REAP Fund are typically obligated for future facility developments or specialized equipment. A portion of the funds may be used for cost-sharing land acquisition and capital improvement grant projects if necessary. For FY 14, the Legislature retained the REAP appropriation at \$16 million. The Board is hopeful that REAP funding may soon reach the originally legislated \$20 million per year level. Since REAP funds are used for special projects and expenditures, the board is not dependent on this special appropriation for operational expenditures. It is anticipated that Woodbury County's REAP funds in the next fiscal year will be used to assist with Little Sioux River access improvements.

13. National Wild Turkey Federation

A local chapter of the National Wild Turkey Federation known as Loess Hills Longbeards was formed in January 2000. The chapter conducts an annual membership and fundraising banquet. Chapter meetings are held at the Dorothy Pecaut Nature Center, and the Director served as publicity chairman during the fiscal year. This group is dedicated to the preservation and establishment of the wild turkey throughout the United States. Most funds raised by chapters are forwarded to a state and national organization and used for a variety of programs to acquire and

enhance habitat and promote the wild turkey. The Conservation Board received a \$7,500 grant in 1999 to assist with an addition to Oak Ridge Conservation Area. Two grants totaling \$17,000 were received in July 2005 and January 2006 to assist with a 228-acre acquisition project in Oak Ridge Conservation Area. A grant for \$10,000 to assist with a 320-acre acquisition project in Oak Ridge was received in January 2008. Staff will continue to work with this organization to promote their efforts in enhancing wildlife habitat and populations in the county.

V. LAND ACQUISITION

There were no acquisitions of land via fee title or by easement during the fiscal year.

Board staff was directed to pursue research and acquisition of about 15 acres of greenbelt along the Little Sioux River near Correctionville at the request of the landowner who inquired about selling the property. This project will be continued into the next fiscal year.

Easements, river accesses, and expansion of Snyder Bend Park will be priorities in the future. Future acquisitions will continue to be dependent upon available grants and the Board's ability to maintain areas. Acquisitions must fit into the Board's plans with priority being placed on Oak Ridge Conservation Area, Owego Wetland Complex, and existing parks. Land is acquired only from willing sellers.

At the end of the fiscal year, the conservation board managed 16 different areas comprising approximately 5,525 acres, and held fifteen easements on over 1,695 acres.

VI. AREA DEVELOPMENT

1. Snyder Bend County Park

Snyder Bend County Park is located two miles southwest of the Salix interchange on Interstate 29. This 35-acre area was acquired in 1961, and is currently managed as a full service outdoor recreation park area. Existing facilities at this site include modern and tent camping areas, a camper's shower and restroom facility, playground equipment and open play areas, picnicking grounds, an open shelterhouse, restroom building, boat ramp and parking lot, paved access and interior roads, concrete trail, four modern family cabins, a residence, and maintenance shop/office and storage area.

Removal of dead and dying trees from effects of the 2011 Missouri River flood continued during the fiscal year. Numerous new bare root trees were planted, staked and mulched as replacements. A small prairie area south of the cabins was reseeded in 2014. An Osprey nesting tower structure was installed south of the park along the lake shore in cooperation with Iowa Department of Natural Resources. Seventeen night lights were upgraded to LED fixtures along with several exterior lights on park structures for energy savings.

Installation of water hydrants for each campsite began in June 2014. Camping usage and cabin rentals continued their strong resurgence following the lost flood year of 2011. The Board experimented with extended cabin stays for construction workers from September - November 2013 which worked well during that slow time of year.

Plans for the next year include continuation of planting trees. The original open shelter needs some refurbishing and the playground surfacing material needs to be replaced with shredded rubber. Other future plans include development of an accessible fishing pier jetty near the lake.

Visitation to the park was very strong in 2013-2014 with an estimated 160,000 visitors during the fiscal year.

2. Bigelow Park - Brown's Lake

Bigelow Park is located on the south shore of Brown's Lake one mile west of the Salix interchange on Interstate 29. This 36-acre state-owned area, which also contains the Dale G. Bell Memorial Arboretum, was acquired from the Department of Natural Resources through management agreement in October 1970. It was renewed in 2002, and again in 2010 for a 50-year lease period. The area is highly developed and is managed as a high-use outdoor recreation park. Facilities at this park include a 41 unit modern camping area, a tent camping area, a camper's shower and restroom building, enclosed shelterhouse with restrooms, playground equipment and open play areas, swimming beach area, concession/restroom building, boat ramp and dock facilities, parking lots, maintenance shed/office and storage area, paved roads, and a residence.

Water hydrants for each campsite were installed in time for the 2014 camping season. Numerous trees were planted as part of the replanting program to diversify species and replace old green ash trees. Volunteer trees and a shrub row were removed along the south boundary fence near the park entrance. A detailed topographical survey was completed of the beach area in preparation of plans to redesign the drainage and usage of the beach.

Brown's Lake Campground

Weekly water quality monitoring was conducted at the swimming beach during the summer months in cooperation with IDNR. Dust control agent was applied to the portion of gravel road near the boat ramp.

Plans for next year include extension of power and installation of night lights at the boat ramp area and continued tree planting. The Manager's residence will be remodeled, night security lighting will be upgraded to LED lighting, and the playground will need minor renovations. Long range improvements include a major renovation or replacement of the beach concession building, constructing an accessible fishing jetty near the picnic area, and clearing more shoreline areas for fishing access.

This popular area experienced strong visitation numbers during the fiscal year with an estimated 180,000 visitors during the fiscal year.

3. Little Sioux Park

This 609-acre developed park area is located two miles southwest of Correctionville off State Highway #31. The bulk of this park area was acquired in 1965, with 118 acres of abandoned county owned gravel pits on the north and 40 acres adjacent to the south added to the park jurisdiction in 1999. Fourteen acres were added in 2004 to provide a trail connector to the town of Correctionville. Thirty-two acres encompassing an old gravel pit adjacent to the shooting range was added in 2008. The park also includes an area formerly known as the Little Sioux Greenbelt, 25 acres of river bottom timber located on the east side of the river and acquired in 1974. Little Sioux Park is currently managed as a high-use outdoor recreation and conservation park. Facilities existing at the park include two modern campground areas with shower and restroom facilities, camping cabins, picnicking grounds, playground equipment and open play areas, enclosed shelterhouse, several small open shelters, three modern restrooms, swimming beach area, shooting range, hiking trails, hard surfaced trail, non-modern campground, a ten acre lake, historic one-room schoolhouse, maintenance shop/office and storage area, paved roads, and a residence.

Improvements during the fiscal year included construction of a new concrete boat ramp access to the Little Sioux River. This project was 90% complete by December with access road and parking lot completed in April. A Water Recreation Access Cost Share grant provided 75% funding for the project. Water quality monitoring on the swimming beach was conducted weekly during the summer months in cooperation with the IDNR. Removal of dead and dying Scotch pine

trees continued with the wood used for camper firewood. Stumps were removed and numerous new trees planted, staked and mulched.

Design engineering was started for beach renovations. A topographical survey was conducted and initial design plans developed to control runoff erosion from the parking lot and beach. A new steel roof was added to the Bellamy Campground campers building. Inmates from the County's Prairie Hills retention center removed the chain link fencing of an old deer pen on the north end of the lake. A seven acre native prairie was reseeded along the Union Bridge Trail. Numerous special events were held at the park including a Youth Day sponsored by the local Pheasants Forever Chapter and Whitetails Unlimited, a Youth Fishing Derby sponsored by Pheasants Forever, and the Halloween Camping Weekend.

Vandalism problems at the Stub Gray Shooting Range resulted in the Board closing the facility May 1. Public meetings were held in June to gather input on suggested changes for the range to determine what can be done to control illegal behavior and get the range reopened.

Plans for next year include renovations at the Stub Gray Shooting Range, renovation of the swim beach area, and continued tree removal and replacement. Future plans include renovation of the Bellamy Campground and addition of playground equipment near the beach.

Little Sioux Park again provided the largest amount of revenue during 2013-2014 and experienced one of its busiest years in history. New and renovated facilities continue to attract more users, and the new trail continues to be extremely popular with park users and Correctionville citizens. It is estimated that the park hosted approximately 300,000 persons during the fiscal year.

4. Fowler Forest Preserve

This attractive day-use area is located one-half mile west of Smithland on State Highway #141. The original 50-acre site was acquired in May 1965, with an additional 58 acres added to the area in 1981. In 1998, 52 acres located between the preserve and the city limits of Smithland was added to the area which now totals 160 acres. This park is managed primarily as a day-use preserve and includes an open picnic shelter, restroom facilities, hiking trails, parking lot, and playground equipment.

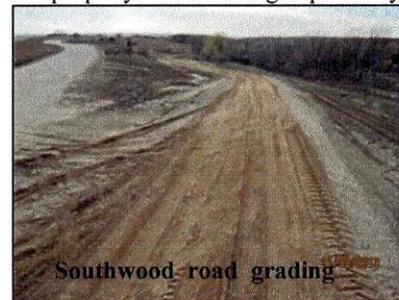

Part of Fowler Preserve includes native grass fields that are managed for seed harvest. Approximately 6.26 acres were burned in spring 2014 to rejuvenate the grasses for seed harvest.

This area continued to be a popular picnicking and rest area stop for persons traveling along Highway 141. Future plans include continued replacement of steep trail sections with railroad tie box steps and renovation or replacement of the large open shelter. Attendance for the fiscal year is estimated at 17,000 people.

5. Southwood Conservation Area

This mostly undeveloped conservation area is located one mile south and three fourths mile west of Smithland. A majority of the area, 463 acres, was acquired from 1978-80 with fifty percent cost sharing funds received through the federal Land and Water Conservation Fund. Another 160 acres was acquired in 1989 with cost sharing from the state Wildlife Habitat Stamp Fund and donations from local Pheasants Forever Chapters. The entire park now totals 623 acres. The area provides a limited amount of development along the east boundary of the property and is managed primarily as a wildlife conservation park. Facilities on this site include primitive and tent camping areas, a nineteen site modern electrical campground, hiking and bridle trails, two 7-acre lakes, boat launching area and dock, modern restroom and shower building, maintenance shop/office and storage area, and a residence.

The main project at this park during the last fiscal year was the re-grading of the steep "S" curve which was extremely difficult to maintain and negotiate by large

campers and horse trailers. A new road grade was constructed along the side of a hill and tied in with the old road below the "S" curve which was removed. Unusually heavy rains in June 2014 resulted in severe erosion of the new grading, ditch and slopes. Work will be done in later summer to correct the damage. Dust control agent was applied to the gravel road along the camping areas.

Support poles for the suspension trail bridge were replaced following failure due to rot. The original shake shingles on the park manager's residence were replaced with heavy asphalt shingles. Cage catfish raised for the last season in 2013 were released into the ponds in August. Several food plots were maintained within the park area. Native grass seed harvest operations were headquartered at Southwood Conservation Area where seed is cleaned, dried and stored. Controlled burns were conducted on 5 acres of grasslands to encourage prairie growth and deter invasive woody vegetation.

Plans for next year include construction of a small picnic shelter. Future plans include extending electrical service to a number of tent campsites and construction of primitive cabin units. Southwood Conservation Area is a popular destination for people who enjoy large, undeveloped open spaces, but still have access to basic amenities. It is also a popular spot for equestrian users, hunters and campers. It is estimated that at least 40,000 people visited this conservation area during the fiscal year.

6. Shagbark Hills

This undeveloped 379-acre natural area is located one and one-quarter miles south of Correctionville on County Road L-27. The area is managed as a public hunting area and is regularly used by hunters, hikers and birdwatchers.

This area is open for public hunting and provides good opportunities for a large variety of upland game species.

7. Midway Park

This 20-acre abandoned gravel pit site is located three and one-half miles north of Merville on State Highway #140. It contains old gravel pit ponds, a vault latrine restroom, rock ramp accesses to the ponds and picnic facilities. The area was acquired in May 1978 from the Midway Park Association of Kingsley, Pierson, Merville and Lawton. The park has been developed into a picnic area and is managed for this purpose. The gravel pit ponds also provide good fishing for many park users.

8. Copeland Park Access

In January 1986, the Board obtained a right-of-way lease for a .36 acre access from the Iowa Department of Transportation located one-half mile west of Correctionville. This site will be maintained as an undeveloped river access.

9. Inkpaduta River Access

In February 1989, the Board obtained a two acre river access by easement through a trade-off agreement involving the closing of an abandoned secondary road right-of-way and establishment of a new right-of-way to the river. The area provides a parking lot and limited access to the Little Sioux River for fishermen and canoeists. Long range plans include installing a graded and rocked canoe ramp access.

10. Inkpaduta Historical Monument

In April 1989, the Board acquired .04 acres adjacent to the county road right-of-way and State Highway #31 for a historical marker site. This area marks the location of the Sioux Indian Inkpaduta's campsite during the winter of 1856-57 where they stayed before being driven away by the white settlers. A large boulder with an 18" X 24" bronze informational plaque was erected on this site in the fall of 1989. This site preserves a small part of county history, and attracts many interested travelers as they pass on the adjacent highway.

11. Walling Access

This 13.04-acre river access on the Little Sioux River near Correctionville was purchased in 1989. The area is managed for wildlife and as an access for canoeists and fishermen to the Little Sioux River. In November 2013 construction began on a new concrete boat ramp with work completed in April. The ramp experienced its first flood event and fared quite well despite some erosion. Plans for next year include extending the concrete ramp an additional 30 feet to eliminate most of the erosion and installation of additional rip rap for protection. Funding for this ramp came from the Board's local Resource Enhancement and Protection fund.

Walling Ramp

12. Oak Ridge Conservation Area

This large, undeveloped conservation area identified by the board in 1990 will be the Board's largest acquisition project when completed in the future totaling approximately 3,200 acres. The largest parcel containing 530 acres was added in 2000, and connected three separate existing parcels. Another 19 acres were added in 2002, 231 acres in 2005, and 315 acres in 2007. The area is located between Oto and Smithland, and presently consists of four separate Units totaling 2,082 acres.

Timber stand improvement work covering 10.4 acres was completed in Unit 2 with the assistance of a Conservation Corps Iowa crew who worked five days on the effort. The project is partially funded with a Wildlife Habitat Incentive Program grant through the NRCS and will average 11 acres per year through 2016. Prescribed burns were conducted on 2.2 acres within Unit 2. The Board entered into a three year contract for minimal haying on an experimental basis as an option to controlled burns to see what the affect would be on wildlife populations. This type of grassland management will probably be used in the future as a management tool and a source of revenue as long as there are no adverse impacts to wildlife.

Future plans include removal of remaining interior fences and continuation of timber stand improvement work that will enhance prairie and timber resources. Existing native prairie areas as well as wooded areas will be rejuvenated through controlled burns. Additional parcels within the identified boundaries of the Oak Ridge Area will be acquired from willing sellers as they become available and as grant monies are available to fund such purchases.

13. Owego Wetland Complex

This 1,330-acre area is located in the Missouri River bottoms adjacent to an abandoned town known as Owego. The original 320-acre parcel was purchased in 1999. Following the purchase of a permanent wetland easement by the federal government, the Conservation Board acquired residual rights and subsequent title to other parcels comprising the complex. Basic wetland restoration work was funded with federal Wetland Reserve Program (WRP) monies.

Crews managed to complete prescribed burns on 244.19 acres. Additional areas were scheduled for burning but will be completed when conditions are favorable. With continued drought conditions throughout the fiscal year, pumping activity to flood shallow water areas for migrating waterfowl was conducted in September. Over 31 million gallons of water was pumped from three irrigation wells over four weeks. Funding for pumping fuel came from the experimental hay contract on Oak Ridge Conservation Area. A youth duck hunt was held in October 2013 sponsored by the local conservation officer.

The Owego Wetland Complex provided good hunting opportunities in the fall of 2013 and spring 2014. A current management plan needs to be written in cooperation with NRCS for this area. The future continues to look bright for the impact this complex will have on wildlife populations as well as outdoor recreation opportunities for hunters and bird watchers.

14. Administrative Offices/Dorothy Pecaut Nature Center

The Dorothy Pecaut Nature Center is located on approximately 10 acres of land in the southwest corner of Stone State Park. The area is under management agreement with the Iowa Department of Natural Resources. The nature center, completed in 1995 features a large exhibit hall, classrooms, library/resource room, gift shop, and conservation board offices. Additional features include a paved access road, parking lot, maintenance shop and a 2.5-mile hiking trail system with outdoor amphitheater.

The newly finished Discovery Forest Outdoor Playscape held its grand opening on October 12 with a large crowd in attendance. This facility continues to be very popular with children of all ages. The exterior entrance deck and ramp were resurfaced in an effort to repair concrete spalling and give a more attractive look to the entrance. Four exterior insulated windows that had lost their seal were replaced. An automatic handicap door opener was installed on the main entrance door. Doors were added to the public restrooms on the main floor. Plans and specifications were approved and bids let for new pavement of the parking lot and access road to the nature center. Funding for this project will be provided by the Board of Supervisors. Prescribed fire was applied to 4 acres of prairie along the entrance road in spring 2014.

Nature Calls 10th anniversary fund raising event for the nature center was held at the Sioux City Convention Center September 14, 2013 and was a huge success. This annual event raises over \$25,000 each year for major projects at the center. Staff worked with Verizon representatives and Woodbury County Information Communication Center to find a source and solution for providing public Wi-Fi access to the nature center. This effort should be completed in the next year.

The entrance road and parking lot are scheduled to be removed and repaved on August 2014. Staff is researching replacement of high energy use fixtures with more economical LED fixtures. Numerous maintenance projects will be completed prior to hosting the annual IACCB Conference in September 2014. All conference attendees will visit and explore the nature center. A very detailed report on the nature center follows in Section VII. Continued strong visitation numbers were experienced during the nineteenth year of operation.

15. Curtin Timber

This 90-acre timbered area located three miles northeast of Oto was purchased in February 1992. The area has been left in its natural state for the last 20 years, and provides excellent habitat for deer and wild turkey. A forty-foot easement for foot access to the property was also acquired from the landowner pending future acquisition of adjoining property that would provide access to the county gravel road. This area is managed as a public hunting area, and is used by many hunters, hikers and mushroom hunters.

16. Riverside Bluffs Area

This 135-acre loess hill native prairie area was acquired in 1992-93 from three different landowners through a state REAP grant that was awarded in 1991. The property is separated by West 19th Street and is located in the Riverside area of Sioux City. The area features virgin loess hills prairie along with outstanding scenic views overlooking the Missouri and Big Sioux River valleys. The area provides a unique, high quality prairie within the city limits.

The Woodbury County Conservation Foundation, which played a significant role in the grant application and acquisition process, continues to raise money for improvements on the area. For the second consecutive year in 2013, the Foundation provided funding to contract with a Conservation Corps Iowa crew of six people for five days to conduct prairie restoration work. Working in conjunction with Conservation Department staff and equipment, and with funding from a two-year grant from the American Great Outdoors program, it is anticipated that 24.5 acres of native prairie will be reclaimed. The Foundation also provided funding for a seasonal habitat intern who spent considerable time on this area and around the nature center.

Additional sections of fence need to be replaced or constructed to control unauthorized use and traffic. Hiking access for the property is maintained and allowed. Controlled management burns of

the prairie areas and elimination of woody vegetation is being planned for the north segment in the next few years. The area is managed as a prairie preserve and includes management practices such as removal of woody vegetation and prescribed prairie burns.

Highlights

the summer months. They also funded an Iowa Conservation Corps Crew to work on prairie management at Riverside Bluffs prairie for one week.

- The WCCF created a Special Projects Fund within the Siouxland Community Foundation to accept non-Endowed gifts for short-term projects.

entry deck and patio was resurfaced. Several improvements and repairs were completed in anticipation of the hosting of the Annual Iowa Association of County Conservation Board Member Conference in September 2014.

- The Dorothy Pecaut Nature Center completed the Discovery Forest Nature Playscape and Loess Falls Water Feature this year. The Grand Opening was held on October 12, 2013.

- Visitation increased by more than 10% after the creation of these new attractions.

- Woodbury County Conservation Foundation (WCCF) donated funds to hire a Habitat Stewardship Intern for

- Spurred by the Raptor House the Adopt an Animal program took flight and numerous private donations were received to assist with animal care.

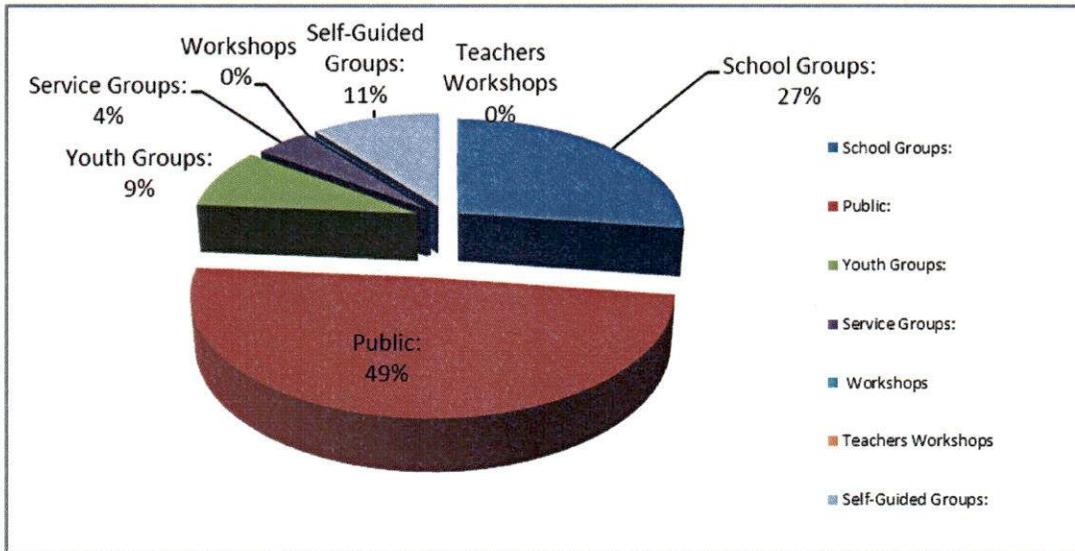

- The 10th Annual Nature Calls Fundraiser in September 2013 boasted one of the largest crowds yet with more than 500 people attending. It was held at the Sioux City Convention Center.

- The Nature Center installed restroom doors and the

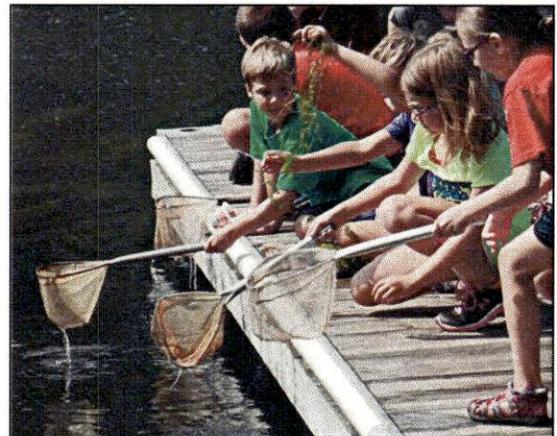

Programs

DPNC's mission of providing quality environmental education and outdoor recreation is carried out through our educational philosophy of environmental awareness, sensitivity, knowledge, understanding, appreciation and responsible actions. Each philosophical step is considered when designing programs for different age levels. To ensure participants receive a positive learning experience our staff is committed to engaging all levels with experiential and interactive activities.

Program Facets:

Public and Family Programs: A wide variety of programming is offered throughout the year for all aspects of families in our surrounding area. This past year we offered 147 public programs and had more than 7,600 participants. Due to the new exhibits and outreach opportunities, we increased our public program reach by 16%. In the winter of 2014, the Nature Center also cooperated with the Woodbury County Conservation Foundation (WCCF) in hosting the *Wildlife of Siouxland* for a wildlife photography program by long-time journalist Larry Myhre. The "Play in the Parks" programs at Little Sioux Park over the Fourth of July weekend was another huge success. The interns provided free programs on archery, fishing, animals, etc. to hundreds of visitors. DPNC also hosted the OWLS (Older, Wiser, and Livelier Souls) for adults to learn more about environmental topics and our natural world. Nature Tales is a popular preschool story time with preschool children and an adult. Winter Fun Day and Summer Programs in the Parks continue to be big hits with the community. The Lunch-Time for Animals is held once per month and allows the public to view the resident animals eating. This has been a popular addition to our program offerings. Our staff believes involving the entire family instills the values of our mission as well as providing quality activities for the residents of our area.

School Groups: DPNC is a field trip site for preschool through high school. The Center's staff provides resources, materials, and curriculum supplements for teachers to enhance the learning process of their students. Approximately 27% of our audience we reach is school children. Within the tri-state area DPNC reaches an average of 150 schools including urban, rural, public, and private audiences. School audiences and outreach remained constant during the past year. Naturalists are working with the Sioux City School District and other schools to continue to promote our programs and facilities. DPNC continues to find new ways to reach students and teachers—an increasing challenge due to the lack of public funds for field trips.

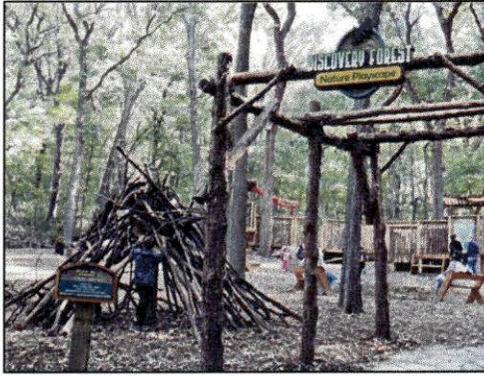

Our Educational Programs Guide lists our offerings for school and youth ages preschool to 12th grade. It is distributed to more than 1,200 teachers in the tri-state area. Last year our direct school programs reached more than 4,200 youth. This was a 13% increase over last year. Additionally, more than 1,600 students visited the Nature Center for a self-guided experience. For Non-Woodbury County Schools, we charge a user fee of \$1.00 per student. These fees are used to provide funding for additional programs, materials, staffing and supplies.

College Groups: Professors from at least four local colleges use the DPNC as an onsite educational tool for their students. DPNC staff also provides programming and internships for students entering the natural resources field. College and University classes from around the tri-state area use our facility for meetings, classes, and field studies. Staff conducts WILD, PLT and WET workshops to pre-service elementary and secondary education students.

Youth Camps & Programs: The DPNC offers Summer Day Camps that reach an average of 300 children annually. Many campers return each year due to the current program's seven levels. This program is developed with our education program goals in mind and is extremely popular. Typically, camps fill within a few weeks after the initial registration date and many camps have a waiting list.

The Summer Camps beginning in June 2014 were very successful with 286 children attending the 17 camp sessions. This season included two sessions for 3-5 year olds with an adult; two sessions for 4-year old campers, five sessions for 5-6 year olds; four sessions for 7-8 year olds; two sessions for 9-10 year olds; and two sessions for 11-12 year olds. The revenue received from the camps helps to pay for the four Summer Naturalists positions. Camps are designed to offer engaging outdoor activities for ages 3 through 12. The Discovery Forest Nature Playscape was an appealing addition for our campers and a great way to help reinforce our outdoor awareness goals.

Participants were again given the choice between 3-day camp sessions or 5-day camp sessions. This continues to be a popular change to the camp program and allows scheduling and financial flexibility for families. In the past we have offered day trips for ages 12-15. We suspended this option for 2014 but are looking to offer it again in the future. This is hopefully something we can provide every other year.

Scholarships were again provided during the 2014 Summer Camp season. The Woodbury County Conservation Foundation co-sponsored the Camps to allow this opportunity and 3 scholarships were awarded totaling \$150. The WCCF sponsorship also allowed us to purchase camp supplies and assisted with transportation for children ages 11-12 to visit Little Sioux Park during their camp session.

Outdoor Skills Grant for Underserved Populations: We received a \$4,000 grant from the Iowa DNR to conduct special fishing programs for underserved urban populations. Kristin Shaw was contracted to conduct these programs part-time beginning May 2013 through August 2013. In May 2014, WCCB received an additional \$2,500 from the Iowa DNR. These funds were to conduct both shooting sports education and fishing activities to underserved populations. Aerial Wauhob was hired to conduct these programs. Additionally Scheels and Woodbury County Pheasants Forever provided money to fund this intern position in 2014.

On-site programming is available for schools, youth, civic and community groups throughout the year. Staff utilizes materials within our teaching collection and live reptiles and amphibians. Native American Youth, ESL youth, scouts, 4-H groups and others often request special programs from our staff. We reached more than 1,300 youth during our programs this year. This was a 46% increase over last year, mostly attributed to the summer programming by the Outdoor Skills Intern.

Service Learning Groups/Volunteers: Resource Naturalist Jim Henning had the opportunity to work with multiple service groups over the last year including; church, school and scout groups. He also worked with two young men trying to achieve the rank of Eagle Scout who did their projects at the nature center. One scout cleared approximately 1 acre of brush along Bluestem Trail and the other is planning on building a "porch" style swing near the Discovery Forest Nature Playscape. Other service groups worked on trail maintenance, landscaping, staining benches, roadside cleanup, playground construction and prairie rescue. This offers a good opportunity for people to help their community and learn about their natural areas at the same time.

Service Group Programs: Programming is also offered for groups such as Garden Clubs, Sertoma Clubs, Rotary, etc. throughout the year. A total of 672 people were reached through these meetings. The Playscape generated a lot of activity and programs and we increased our outreach in this area by 48%.

Workshops: The educational staff presents programs at a variety of workshops designed for adults in the profession. Last year a total of 150 people were reached in workshops. Primarily, the workshops included Hunter Education.

Teacher Training: In cooperation with Iowa’s Area Education Agency (AEA 4/12) and Morningside College the DPNC staff is able to offer a variety of workshops including Project WILD, Project WET and Project Learning Tree (PLT) for teachers’ continuing education and graduate credits. Pre-service workshops are offered to college students pursuing an educational degree. The past year, 2 workshops were offered, providing service to more than 45 pre-service teachers. Other groups use our facility for their teacher workshops as well.

Community Development: Staff networks with a variety of community agencies to maximize resources. Some partnerships include cooperative teaching with Area Education Agencies, schools, WIT and City of Sioux City. She serves as a director to the board of Friends of FM90 radio and is on the Siouxland Association of Fundraising Professionals Board. Snyder also joined the REAP-CEP Board and scores statewide grants for educational projects twice per year on behalf of the Iowa Association of County Conservation Boards. WCCB collaborated with the Sioux City Public Library and the City of South Sioux City Library for Summer Reading Program and provided programs in both Library buildings. DPNC was also involved with the efforts to make Sioux City a Blue Zones Community.

Casual Visitors: DPNC is open to the public 9am-5pm Tuesday through Saturday and 1-5pm on Sundays. Evening programs are available by appointment. Areas of interest include hiking trails through native prairie and woodlands, wildlife viewing area, all new interpretive displays including an interactive badger in a tunnel under the prairie diorama, working beehive, and 400 gallon native fish aquarium, resident education animals, and butterfly and herb gardens. The new Raptor House brought in several new visitors. An estimated 51,000 people visited the Nature Center last year.

Grants:

The WCCB and WCCF applied for 6 grants during this period, requesting and receiving a total of \$16,681.00. Total amount requested was \$18,431.00.

<u>Grants July 1, 2013 - June 30, 2014</u>	<u>Amount received</u>	<u>Funds Targeted For</u>
BNSF Railway Foundation	\$10,000.00	Playscape Phase II
Wal-Mart Foundation	\$500.00	Playscape
Iowa Native Plant Society	\$931.00	Prairie Rescue Equipment
Mildred Anderson Grant—Jr. League of SC	\$ 750.00	Nature Playscape Tracks
Iowa DNR—Outdoor Skills for Underserved Populations	\$4,500.00	Programs
Total received:	\$16,681.00	

Nature Center

Trails: The trails provide a great interpretive asset for programs and wonderful recreational addition for park users. Resource Naturalist Jim Henning continues to work with volunteers and service learning groups. Wood chips were added to the trails when possible. Decks, benches and bridges along the trails are stained annually. Hazard trees are removed from grounds and trails as needed. An informational kiosk is located at each trail head and provides information on

the trails, plant identification and natural history information. Student interns provide temporary display information for each of the kiosks. Future plans for trails include reworking areas along Hidden Valley, Bluestem Trail and White Tail Ridge to make the trails more level, thus a little more user friendly. There are also plans for further development of Fox Run and additional enhancements and signage along the other trails. Prairie management, including woody vegetation removal and prescribed fire, is coordinated by Mark Peterson and Jim Henning.

Resource Management and Maintenance:

Projects over the last year included development and implementation of management plans for the playscape and water feature; the nature center trails are an ongoing project- nature center staff and volunteers moved wood chips onto trails and spent many hours maintaining the stairways along our trails. Other maintenance projects over the year included mowing, snow removal and exhibit troubleshooting.

Exhibits

The new exhibit gallery opened in April 2011. The

changes have been well-received and we have had very little problems with the design and functionality. Any problems have been readily addressed by Split Rock Studios. A 5-year warranty was provided with their contract of service.

DPNC focused this year on outdoor exhibits—branching to outdoor exhibits with the Raptor Enclosure and Natural Playscape projects.

Raptor Enclosure

The Raptor House grand opening and dedication of the Raptor House was held May 4, 2013. The facility houses two large birds of prey. In late April 2013 WCCB acquired two new raptors from Kay Neumann of SOAR. A Barred Owl and a Red-

tailed Hawk were added to the live animal exhibits at the Nature Center. The public reception of the new birds, raptor house and Skye the Kestrel has been excellent. Raptors are used for educational programs for schools, camps and the public. Visitation has increased overall and many people stop to view the birds of prey. [Discovery Forest Nature Playscape](#)

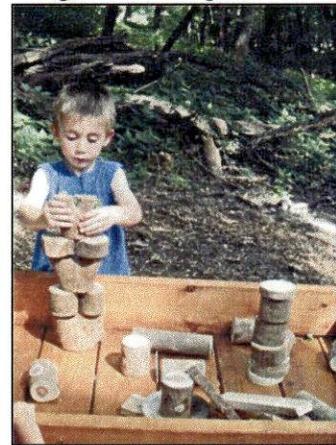

The Nature Playscape is a nature-based play area that allows children to climb a tree fort, clamber over logs, create natural art, wade in the water and experience safe, outdoor play. Research shows that regular time in nature reduces stress, supports creativity and imaginative play, facilitates better social and physical development and improves fitness, motor-skills and well-being. The Nature Playscape was designed to enable this process.

The Grand Opening was held October 12, 2013. The \$95,000+ project was made possible through generous individual contributions and numerous grants. More than \$115,000 was raised.

In addition to the Nature Playscape, a Loess Falls Water Feature is located adjacent to the Nature Center and new Raptor House. The area is designed for gentle water play and observation. The upper pool has four large “stepping stone” boulders that people are able to cross to reach a quiet reflection area and sit on a bench. The lower pool is designed for people to gradually wade into the water. There is a zero access point, even allowing mobility impaired guests to explore the water.

From the start, much of this project has been volunteer-driven. The Junior League of Sioux City has played an integral part of the planning and funding process. Additional Playscape components were created by volunteers, including two Eagle Scout candidates and their Scout Troops. Jeremy Hill of Troop 225 constructed the Entry Feature or Pergola of the Playscape. Matt Rodasky of Troop 225 built several benches for the Playscape. More than 91 Nature Center volunteers have helped with this project over the past several months—logging more than 465 hours.

Marketing

The WCCB and Dorothy Pecaut Nature Center maintains a positive relationship with local media. The naturalists participated in more than 180 interviews for radio, television and newspaper during the past year. In addition to media releases, PSA's, articles and interviews, WCCB parks are included in two I-29 rest area kiosks. Networking with Western Iowa Tourism Region, Siouxland Hospitality Association, Iowa Tourism Bureau, Iowa Welcome Centers and Siouxland Tourism Bureaus has allowed expanded visibility of our areas.

An advertisement was placed in the Siouxland Visitor's Guide to attract additional tours and visitors to our area. An ad was also placed in an advertising supplement for Iowa tourism. This piece reached more than 1 million households via the Des Moines Register, Omaha World Herald & Minneapolis newspapers. DPNC was featured in Iowa Department of Economic Development television and magazine ads to promote Iowa. WCCB also participated in advertising for a map of Sioux City. The Conservation Board provided an informational booth at the Woodbury County Fair.

Woodbury Wanderings Newsletter

Our newsletter is published 3 times a year and features updates on our parks, natural history articles and our calendar of events. The newsletter is also online with the addition of our web page. The newsletter is mailed to approximately 2,200 households three times per year. Since June 2003, issues have also included a downloadable PDF version of the newsletter. Interested subscribers are encouraged to request their newsletter online or in this format to reduce mailing costs of the publication.

Web Page <<http://www.woodburyparks.com>>

The site features beautiful new photos, updated information, video clips of the cabins, shelters and nature center and the ability to donate online to the Woodbury County Conservation Foundation. Maps of all WCCB areas are available as .PDF files to download for free.

Rentals

The Nature Center is an attractive spot for business retreats and private rentals. The classrooms have been rented to numerous groups for anniversary parties, wedding receptions, family reunions and business retreats. More than 1,900 people (a total of 77 groups) used our rooms for a rental space. The revenue generated from these rentals goes to the General Fund for reimbursement. Last year the Nature Center collected \$4,130.00 in revenue. The Nature Center recognizes groups such as Friends of Stone Park, Audubon Society, and Sierra Club that have a primary mission of conservation and education as "First Priority Users." These groups are allowed free use of our meeting rooms. The combined number of groups (Rentals and First Priority) using our facility was 29 groups. Rental rates for the nature center stayed the same as last year, with a price break for non-profit groups.

Nature Nook Gift Shop

The Nature Center gift shop sells items such as shirts, postcards, books, note cards, and nature-related toys and gifts. We also feature handmade items from local artists such as wooden bowls and jewelry. All proceeds from the shop go to the Nature Center.

Staff

DPNC has a total of six staff dedicated to the operation and programs of the facility. Dawn Snyder serves as Nature Center Education Director and Head Naturalist and holds BS in Fisheries and Wildlife Biology from Iowa State University. She has more than 26 years of experience in the interpretation field, with 17 years as DPNC Director and 9 years as Head Naturalist for WCCB. She serves as the Secretary/Treasurer of the Woodbury County Conservation Foundation. Snyder also serves on the state REAP-CEP grant review committee as a representative for IACCB and Loess Hills Alliance Promotion Committee.

Theresa Kruid, Naturalist, has been at the DPNC for 17 years. She has 22 years of experience in the interpretation field and holds BS in Recreation and Park Management (Environmental Interpretation and Outdoor Education emphasis) from Pennsylvania State University. The naturalist developed DPNC's successful summer day camp program, which completed eleven years of camps and continues to grow each year.

Jim Henning has been the Resource Naturalist for five years. He has a Natural Resource Management degree from Upper Iowa University. His duties include programming, resource management and building and grounds maintenance.

DPNC Support staff includes 2 part-time receptionists, Pam Pfautsch and Marilyn Milbrodt, and a Part-time Volunteer Coordinator/ Receptionist, Betty West. Summer staff for 2013 included Elliott Zadow, Jillian Lenz, Aerial Wauhob, and Coreen Robinson. Kristin Shaw was hired as Outdoor Skills intern, funded by a grant from Iowa DNR. She taught fishing and shooting sports to underserved populations. Funds from WCCF allowed us to hire a Habitat Stewardship Intern. Abby Duin was hired to fill this seasonal position. Eric Koithan, Maria Korver, Katie Larson and Tory Warnke served as seasonal employees to assist with summer programs and events in 2014. Another Iowa DNR grant allowed us to hire Aerial Wauhob as the Outdoor Skills intern. Jon Halvorson was hired as 2014 Habitat Stewardship Intern funded by

WCCF. DPNC general hours are 9am to 5pm Tuesday through Saturday and Sunday from 1-5pm.

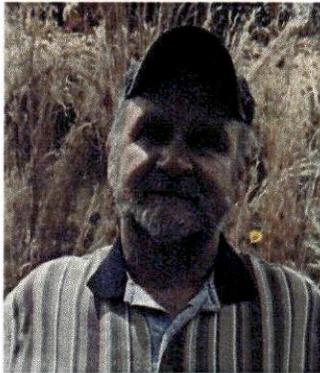

Each of the interns had a chance to experience habitat management and/or trail work for two weeks during the summer. Most of them had the chance to work with service groups and all of them were trained with chainsaws and brush cutting equipment. They each also had the opportunity to learn how to operate our John Deere Gator and Bobcat skid loader.

Volunteers

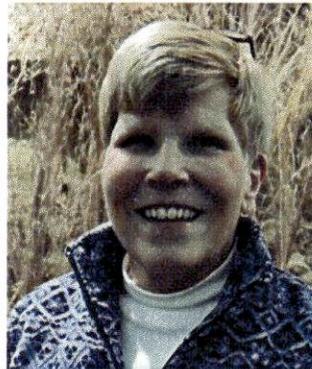

During the past 12 months volunteers logged more than 2,675.50 hours of volunteer service. Support staff at the Nature Center and WCCB is comprised of approximately 185 non-paid active volunteers, 34 of these being Junior Volunteers under the age of 18. Volunteer duties include animal care, gardening, reception & clerical, summer camp naturalist assistants, prairie rescue, educational, curatorial, research, trail maintenance, program assistance, fund raising and general maintenance. Nine service groups also assisted with prairie rescue/habitat management, mulching trails, staking, playscape, water feature and several maintenance projects. Contributed service translates to an estimated \$29,577.25. Volunteers were recognized at the 16th Annual Volunteer Recognition and Awards Dinner in March 2014.

Conservation Awards

This was the 25th year for the WCCB to confer awards to outstanding individuals for their dedicated service. Donna Popp received the *Friend of Conservation* award for her support of the Dorothy Pecaut Nature Center programs and projects. Dick Sorenson was recognized for the *Conservation Educator* award for his years as Iowa Volunteer Hunter Education Instructor.

**Conservation Educator

**Friend of Conservation
Donna Popp**

Special Projects

Fundraising—Nature Calls 2013

A group of volunteers was recruited to assist with fundraising ideas. *Nature Calls*—a beer sampling, nature art sale and auction—was the targeted special event fundraiser. The 10th Annual Nature Calls raised an additional \$28,000 for Nature Center exhibits and educational programs. An additional \$2,515 was raised in a raffle for the Playscape

project. Committees worked throughout the year to plan this large event, which although it requires a tremendous amount of staff time, was considered a worthwhile endeavor. The event was held at the Sioux City Convention Center and was one of our largest crowds, boasting more than 520 people.

Woodbury County Conservation Foundation

The WCCB maintains a close relationship with the Conservation Foundation (WCCF). Dawn Snyder serves as the Foundation's Secretary and Treasurer.

WCCF hosted its annual meeting at the Dorothy Pecaut Nature Center in February 2014. The event included a presentation by Larry Myhre of the Sioux City Journal. More than 80 people attended this educational event. The Foundation co-sponsored the Conservation Board Summer Day Camps to provide \$150 in scholarships for underprivileged youth. They also contributed approximately \$1,000 in educational materials and supported the Loess Hills Prairie Seminar. They also funded a 6-person Iowa Conservation Corps crew to work at Riverside Bluffs for one

week. They continue conservation education and natural area protection in our area. The minutes of WCCF meetings are on file at the WCCB Office.

The WCCF initiated an annual membership campaign in 2003 to increase visibility and assist with special needs. The 2013-2014 membership campaign built upon the success of the past eight years. This year's membership increased by more than 30 members.

October 1, 2013 – September 30, 2014	WCCF Memberships
54 Individual Memberships	\$ 1,095.00
77 Family Memberships	\$ 2,350.00

9 Prairie Conservationist Memberships	\$ 2,300.00
4 Wetland Conservationist Memberships	\$ 2,400.00
4 Distinguished Conservationist Membership	<u>\$ 6,000.00</u>
236 Memberships	\$ 21,059.00
Donation Preference Breakout:	
To Help Further WCCF's Mission	\$ 12,129.00
For Dorothy Pecaut Nature Center Support & Camps	\$ 6,170.00
For Nature Playscape	\$ 1,560.00
For Loess Hills Area Habitat Support	\$ 1,150.00
For Woodbury County Boat Ramps	<u>\$ 50.00</u>
Total Memberships	\$ 21,059.00

Current members of the WCCF Board of Directors are: Brian Hazlett, President; Chris Zellmer-Zant, Vice President; Dawn Snyder, Secretary/Treasurer; Dianne Blankenship; Herman Schultz; Bob Moritz; Norbert Ruhland; Randy Kramer, Anne Shaner and Rod Tondreau. Online donations can be received via a PayPal account, allowing more avenues to donate. WCCF is the channeling agency for the Nature Calls fundraiser and continues to be a vehicle for transfer of large donations to the Woodbury County Conservation Board.

Endowment

In May 2012 the WCCF established an endowment fund within the Siouxland Community Foundation. This will give donors a simple and efficient way to continue supporting the Woodbury County Conservation Foundation (WCCF) while providing us with a source of lasting support. The Woodbury County Conservation Foundation Endowment Fund is designed to give donors access to the most favorable tax advantages available as well as help WCCF develop planned giving programs. A separate Special Projects Fund within the Siouxland Community Foundation was established in Fall of 2013.

List of Donors

Numerous individuals and organizations assisted us in the past year. We would like to acknowledge them for their generous support.

Closed Mondays, Thanksgiving Day, Christmas Eve, Christmas Day and New Years Day.

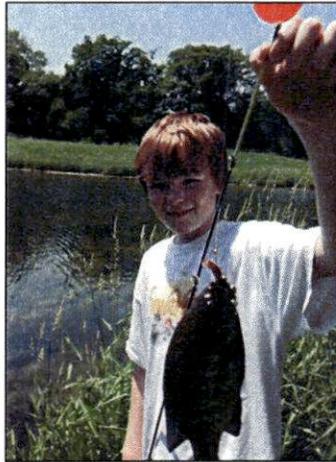

**A Program of
Woodbury County**

DPNC Mission Statement:

To provide quality environmental education programs and outdoor recreation experiences; to manage our natural resources in an ecologically sound manner; and to conserve and interpret our natural, historic, and cultural resources.

Goal of the Environmental Education Program:

- To help citizens of all ages and backgrounds develop an awareness and sensitivity toward the environment.
- To acquire knowledge and understanding for effective environmental action.
- To foster positive attitudes and patterns of conduct toward the environment.
